1	Introduction	1
2	State of the Art	3
2.1	Laser Welding	3
2.1.1	Laser welding process	3
2.1.2	The laser welding applications	4
2.2	Hot cracking by welding - Definition and classification	6
2.3	The interacting factors for weld solidification cracking by welding	7
2.4	Solidification cracking criteria	8
2.4.1	Strain-based criterion	8
2.4.1.1	Strain theory	8
2.4.1.2	Technological strength theory	10
2.4.1.3	Generalised theory	11
2.4.1.4	Shrinkage-feeding criterion	13
2.4.1.5	The Rappaz-Drezet-Gremaud (RDG criterion)	14
2.4.2	Stress-based criterion	15
2.5	The material and its susceptibility to hot cracking	16
2.6	Methodologies of investigation of the critical conditions of solidification cracking	21
2.6.1	The hot cracking tests	22
2.6.1.1	Self-restraint hot cracking tests	22
2.6.1.1.1	Free edge test	22
2.6.1.1.2	Houldcroft test	23
2.6.1.1.3	Fan-shaped test	23
2.6.1.1.4	The U-type hot cracking test	24
2.6.1.2	Externally loaded cracking tests	25
2.6.1.2.1	Trans-varestraint and varestraint test	25
2.6.1.2.2	Hot deformation rate test	27
2.6.1.2.3	Controlled Tensile Weldability test	28
2.6.2	Near-field measurements: in the vicinity of the solidification front	29
2.6.2.1	Strain gauge	29
2.6.2.2	Moiré technique	30
2.6.2.3	Electronic speckle pattern interferometry	30

2.6.3	Optical measurement techniques	31
2.6.3.1	Digital Image correlation	34
2.6.3.2	Measurement by means of in situ observation – MISO technique	35
2.7	Numerical simulation	39
2.8	Conclusions of the state of the art	43
3	Objectives of the Work	45
4	Experimental Procedure	47
4.1	Test material	47
4.2	Improving the Hot cracking test (CTW)	48
4.2.1	Design and development of hot cracking tests	48
4.2.2	Test procedure: CTW test	49
4.2.3	Repeatability test	52
4.3	Measurement using the Digital Image Correlation (DIC)	53
4.4	Developing a Full-field optical measurement technique	54
4.4.1	Validation	55
4.4.1.1	Using computer-generated speckle	55
4.4.1.2	Using the tensile test	56
4.4.2	Development of the OF algorithm to determine the strain in the mushy zone	57
4.5	Numerical model	59
4.5.1	Solidification crack initiation model	63
4.6	Welding and test parameters	64
5	Results	67
5.1	Hot cracking test: CTW test	67
5.1.1	The hot cracking susceptibility	67
5.1.2	Repeatability test	71
5.2	Digital Image Correlation (DIC) measurements	72
5.3	Developed measuring technique	76
5.3.1	Validation of the developed measuring system	76
5.3.1.1	Using computer-generated speckle	76
5.3.1.2	Using the tensile test	78
5.3.2	Full field strain measurement using the developed measuring technique	81
5.4	Numerical simulation results	84
5.4.1	Simulation of crack formation	88
6	Discussion	91
6.1	Evaluation CTW test results	91
6.1.1	The hot cracking susceptibility	91

6.1.2	Repeatability test	93
6.2	Evaluation of Digital Image Correlation (DIC) measurements	94
6.3	Evaluation of the proposed measurements technique (OF)	97
6.3.1	Discussion of the validation results	97
6.3.1.1	Using computer-generated speckle	97
6.3.1.2	Using the tensile test	100
6.3.2	Evaluation of the full field strain measurements during welding	103
6.4	Discussion of the efficiency of the measurement techniques	108
6.5	Comparison between the global and local straining conditions	111
6.6	Re-categorization of the measurements technique according to their measuring locations	113
7	Summary	115
	List of Figures	117
	List of Tables	123
	List of abbreviations and symbols	125
	References	127
	Own Publications	137
