

CONTENTS

Preface	iii
1 Introduction	1
2 Discrete conformal mappings based on conformally equivalent triangulations and on circle patterns	5
2.1 Discrete conformal mappings based on conformally equivalent triangulations . . .	5
2.1.1 Quasiconformal distortion of projective maps	6
2.1.2 C^∞ -convergence of discrete conformal maps	8
2.2 Discrete conformal maps based on circle patterns	11
2.3 Conformally symmetric triangular lattices	14
2.4 Discrete ϑ -conformal maps	16
3 Convergence of discrete period matrices and discrete holomorphic integrals for ramified coverings of the Riemann sphere	19
3.1 Discrete harmonic and holomorphic functions, discrete holomorphic integrals and discrete period matrices	20
3.2 Convergence of energy and discrete period matrices and convergence of discrete holomorphic integrals	22
4 Approximation of discrete isothermic surfaces	27
4.1 Smooth and discrete isothermic surfaces	28
4.1.1 Discrete isothermic surfaces and discrete Björling problem	29
4.1.2 Discrete Gauss-Codazzi system	30
4.2 The continuous limit of discrete isothermic surfaces	32
4.2.1 The abstract convergence result	32
4.2.2 The discrete Björling problem and its continuous limit	34
Bibliography	36
Appendices	
A Quasiconformal distortion of projective transformations and discrete conformal maps	
S. Born, U. Bücking, and B. Springborn, <i>Quasiconformal dilatation of projective transformations and discrete conformal maps</i> , Discrete Comput. Geom., vol. 57, no. 2, pp. 305–317, 2017. DOI: https://doi.org/10.1007/s00454-016-9854-7	
B Approximation of conformal mappings using conformally equivalent triangular lattices	
U. Bücking, <i>Approximation of conformal mappings using conformally equivalent triangular lattices</i> , in <i>Advances in Discrete Differential Geometry</i> , A.I. Bobenko, Ed., Springer, 2016, pp. 133–149. DOI: https://doi.org/10.1007/978-3-662-50447-5_3 .	
C C^∞-Convergence of conformal mappings for conformally equivalent triangular lattices	
U. Bücking, <i>C^∞-convergence of conformal mappings for conformally equivalent triangular lattices</i> , Results in Math., vol. 73:84, 2018. DOI: https://doi.org/10.1007/s00025-018-0845-2	

D Conformally symmetric triangular lattices and discrete ϑ -conformal maps

U. Bücking, *Conformally symmetric triangular lattices and discrete ϑ -conformal maps*,
 Int. Math. Res. Not. IMRN, Dec. 2019, rnz308. DOI: <https://doi.org/10.1093/imrn/rnz308>

E On rigidity and convergence of circle patterns

U. Bücking, *On rigidity and convergence of circle patterns*, Discrete Comp. Math.,
 vol. 61, no. 2, pp. 380–420, 2019. DOI: <https://doi.org/10.1007/s00454-018-0022-0>

F Convergence of discrete period matrices and discrete holomorphic integrals for ramified coverings of the Riemann sphere

A. I. Bobenko and U. Bücking, *Convergence of discrete period matrices and discrete holomorphic integrals for ramified coverings of the Riemann sphere*, preprint, e-print arXiv:1809.04847 [math.CV], 2018

G Constructing solutions to the Björling problem for isothermic surfaces by structure preserving discretization

U. Bücking and D. Matthes, *Constructing solutions to the Björling problem for isothermic surfaces by structure preserving discretization*, in *Advances in Discrete Differential Geometry*, A.I. Bobenko, Ed., Springer, 2016, pp. 309–345. DOI: https://doi.org/10.1007/978-3-662-50447-5_10

H Introduction to discrete complex analysis

U. Bücking, *Introduction to linear and nonlinear integrable theories in discrete complex analysis*, in *Symmetries and Integrability of Difference Equations*, ser. CRM Series in Mathematical Physics, D. Levi, R. Rebelo, and P. Winternitz, Eds., Springer, 2017, pp. 153–193. DOI: https://doi.org/10.1007/978-3-319-56666-5_4
