

# Content

<b>Nomenclature</b> .....	<b>v</b>
<b>Abstract</b> .....	<b>I</b>
<b>Zusammenfassung</b> .....	<b>III</b>
<b>1 Introduction</b> .....	<b>1</b>
<b>2 Motivation, Scope and Objective</b> .....	<b>3</b>
<b>3 Background</b> .....	<b>7</b>
<b>3.1 Native Lignin and its Molecular Structure</b> .....	<b>7</b>
<b>3.2 The <i>in vivo</i> Degradation Process of Lignin</b> .....	<b>9</b>
<b>3.3 The <i>in vitro</i> Bioconversion Mechanism of Heme Peroxidases</b> .....	<b>11</b>
3.3.1 The simplified, non-inhibited reaction mechanism of heme peroxidases .....	12
3.3.2 The heme peroxidase reaction mechanism and its side reactions.....	16
<b>3.4 EMRS for POX-catalyzed Degradation Reactions: State of the Art</b> .....	<b>19</b>
<b>3.5 Crossflow Ultrafiltration for Treating Complex Protein-Lignin Mixtures</b> .....	<b>21</b>
3.5.1 Fundamental aspects of membrane fouling: Characterization and modeling .....	21
3.5.1.1 Categories and development of membrane fouling.....	21
3.5.1.2 Characterization and analysis membrane fouling mechanism – The Field model.....	25
3.5.2 Mathematical modeling of mass transport and prediction of permeate flux .....	27
3.5.3 Determination and/or prediction of the diffusion coefficient $D_{AB}$ .....	35
3.5.4 The effect of aqueous polydisperse systems on UF performance .....	38
<b>4 Materials and Methods</b> .....	<b>41</b>
<b>4.1 The VP Kinetics</b> .....	<b>41</b>
4.1.1 Preparation of the used VP.....	41
4.1.2 Preparation of the co-substrate $H_2O_2$ .....	41
4.1.3 VP activity measurements .....	42
4.1.3.1 Procedure of the activity assay.....	42
4.1.3.2 Preparation of the sodium acetate buffer .....	42
4.1.3.3 Preparation of an ABTS working solution .....	43
4.1.4 The adlerol assay for studying the VP kinetics .....	43
4.1.4.1 The general procedure of the adlerol assay .....	43
4.1.4.2 Determination of the pH optimum.....	43
4.1.4.3 Buffer preparation .....	44
4.1.4.4 Preparation of an adlerol stock solution.....	44
4.1.5 Experimental set-up for studying the VP deactivation by $H_2O_2$ .....	44

<b>4.2</b>	<b>Fed-batch Experiments</b> .....	<b>46</b>
4.2.1	Screening of experimental parameters: H <sub>2</sub> O <sub>2</sub> feed rate and adlerol concentration .....	46
4.2.2	Dynamic model evaluation in the fed-batch regime .....	47
4.2.2.1	Experimental setup .....	47
4.2.2.2	Photometric analysis of H <sub>2</sub> O <sub>2</sub> by peroxy titanium acid .....	48
<b>4.3</b>	<b>The UF Experiments</b> .....	<b>49</b>
4.3.1	The experimental set-up .....	49
4.3.1.1	Ceramic Membranes .....	50
4.3.1.2	The cleaning procedure .....	50
4.3.2	Preparation of the model feed system .....	51
4.3.2.1	The basic model feed streams .....	51
4.3.2.2	Preparation of a protein working solution .....	52
4.3.2.3	Preliminary investigations: Evaluating the effect of MWCO and hydrodynamics .....	52
4.3.3	Set-up of the parametric study .....	53
4.3.4	The analytics .....	54
4.3.4.1	RP-HPLC .....	54
4.3.4.2	Rheological measurements .....	55
<b>4.4</b>	<b>Error Calculations</b> .....	<b>56</b>
<b>5</b>	<b>Results and Discussion</b> .....	<b>57</b>
<b>5.1</b>	<b>The VP Reaction System</b> .....	<b>57</b>
5.1.1	The effect of the pH on the reaction rate .....	57
5.1.2	Development of a kinetic model for the H <sub>2</sub> O <sub>2</sub> -dependent adlerol degradation .....	58
5.1.2.1	Analysis of the VP reaction mechanism .....	58
5.1.2.2	Analysis of the VP inactivation mechanism .....	63
5.1.3	Fed-batch experiments: Verification of the enzyme kinetics .....	66
<b>5.2</b>	<b>The UF Process and its Performance</b> .....	<b>74</b>
5.2.1	Parameter screening: Choice of the MWCO and the fluid dynamic conditions .....	74
5.2.2	Membrane characterization: A parametric study .....	77
5.2.2.1	The impact of the ligninsulfonate and protein load on flux and mass transfer behavior .....	77
5.2.2.2	The empirical determination of the mass transfer coefficient k at high LS loads .....	82
5.2.3	Membrane fouling analysis .....	84
<b>5.3</b>	<b>Design and Operation of a Promising EMRS at Limiting Flux</b> .....	<b>86</b>
5.3.1	Approximation of the limiting flux/optimum flux .....	86
5.3.2	The bioprocess design and reactor performance .....	88
5.3.2.1	Simulation of the EMRS, its productivity and the impact of the hydraulic retention time .....	88
5.3.2.2	O <sub>2</sub> measurements for a simple process monitoring and control .....	95
<b>6</b>	<b>Conclusion and Outlook</b> .....	<b>97</b>
