

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Objective and Scope	2
1.3	Outline	8
2	Theoretical Basis of Precise Orbit Determination	10
2.1	Time and Coordinate Systems	10
2.2	Satellite Motion	13
2.2.1	Motion and Variational Equations	13
2.2.2	Gravitational Forces	15
2.2.3	Non-gravitational Forces	24
2.2.4	Orbit Numerical Solution	31
2.3	Observational Model	32
2.3.1	Measurement Equation	32
2.3.2	Corrections	34
2.4	Sequential Least Square Estimation	38
3	Enhanced Higher Order Ionospheric Correction Method	45
3.1	Higher Order Ionospheric Corrections	45
3.1.1	Observational Model with HOI Corrections	45
3.1.2	Ionospheric Model	48
3.1.3	Geomagnetic Field Model	52
3.2	Analyses of HOI Effects	57
3.2.1	Temporal-spatial Characteristics	57
3.2.2	STEC Assessment	61
3.3	Analyses of Orbit Accuracy	63
3.3.1	Comparison of Geomagnetic Field Models	63
3.3.2	SLR Validation	66
4	Adapting Solar Radiation Pressure Model for BDS-3 Satellites	69
4.1	BDS-3 Satellite POD	69
4.1.1	Overview	69
4.1.2	Observational Model	71
4.1.3	Yaw Attitude Models	72
4.1.4	Solar Radiation Pressure Models	73

4.2	Data Processing	76
4.2.1	BDS-3 Data	76
4.2.2	Processing Strategy	78
4.3	Results	79
4.3.1	Orbit Quality of ECOM1 and ECOM2 Models	79
4.3.2	Parameterization Analyses over Deep Eclipse	82
4.3.3	Validation of the Adapted SRP Model	86
4.3.4	Orbit Prediction	90
4.3.5	Analyses of the Box-wing Model	92
5	Improving Computational Efficiency of Multi-GNSS POD	97
5.1	Multi-GNSS Ultra-rapid POD	97
5.1.1	Processing Strategy and Challenges	97
5.1.2	Possible Improvements and Key Issues	99
5.2	Parallel Processing for POD	101
5.2.1	OpenMP Application Program Interface	101
5.2.2	OpenMP Parallel Algorithm for POD Processing	102
5.3	Validations	105
5.3.1	Implementation	105
5.3.2	Data Processing Schemes	107
5.3.3	Results	109
6	Conclusion	122
6.1	Summary	122
6.2	Outlook	124
