

Table of Content

TABLE OF CONTENT	I
LIST OF ABBREVIATIONS	III
LIST OF FIGURES	VIII
LIST OF TABLES	X
1 INTRODUCTION.....	1
1.1 Relevance of Honey Bees in Human Health and Ecosystem	1
1.2 American Foulbrood	1
1.3 Non-Ribosomal Peptide Synthetases (NRPSs).....	3
1.4 Development of Antibiotic Resistance as Defense Mechanism	6
1.5 Secondary Metabolites Produced by <i>Paenibacillus larvae</i>	10
1.6 Bacterial Communication and Chemosensing	13
2 AIM OF THE WORK	18
3 MATERIALS	19
3.1 Equipment and Software	19
3.2 Oligonucleotides	21
3.3 Vectors	22
3.4 Microorganisms	22
3.5 Media	23
3.6 Solutions and Buffers.....	23
3.7 Chemicals, Enzymes and Labware	24
4 METHODS	28
4.1 Microbiology.....	28
4.1.1 Preparation of Chemically Competent <i>E. coli</i> Cells	28
4.1.2 Cultivation of <i>E. coli</i> with Respective Plasmids	28
4.1.3 Cultivation of <i>B. megaterium</i>	28
4.1.4 Cultivation of <i>P. larvae</i> and Related Deletion Mutants.....	28
4.1.5 Preparation of Cryogenic Solutions.....	29
4.2 Molecular Biology	29
4.2.1 Genomic DNA Isolation from <i>P. larvae</i>	29
4.2.2 Polymerase Chain Reaction (PCR).....	29
4.2.3 Agarose Gel Electrophoresis.....	29
4.2.4 Restriction Digest and Ligation.....	29
4.2.5 Transformation.....	30
4.2.6 Plasmid DNA Isolation from <i>E. coli</i> and DNA Sequencing	30
4.2.7 Generation of Deletion Mutant <i>P. larvae</i> Δ <i>pamZ</i>	30
4.2.8 Generation of Deletion Mutant <i>P. larvae</i> Δ <i>stam</i>	31
4.3 Bioinformatics	31
4.3.1 AntiSMASH	31
4.3.2 Clustal Omega and Jalview	31
4.3.3 DALI Server.....	31
4.3.4 SIRIUS 4.0	31
4.4 Protein Purification	32

4.4.1	TEV Protease	32
4.4.2	<i>N</i> -Acetyltransferase PamZ	32
4.4.3	NRPS-like Protein StAM	32
4.5	Protein Crystallization and Structure Determination	33
4.6	Natural Product Purification	33
4.6.1	(<i>N</i> -Acetyl)paenilamicin from Supernatant of <i>P. larvae</i>	33
4.6.2	(<i>N</i> -Acetyl)paenilamicin from Cell Pellets of <i>P. larvae</i>	34
4.6.3	2,5-Diisopropylpyrazine from Supernatant of <i>E. coli</i>	34
4.6.4	2,5-Diisopropylpyrazine from Supernatant of <i>P. larvae</i>	35
4.7	Bioanalytics	35
4.7.1	Sodium Dodecyl Sulphate Polyacrylamide Gel Electrophoresis (SDS-PAGE)	35
4.7.2	Analytical Size Exclusion Chromatography.....	35
4.7.3	Size Exclusion Chromatography Multi Angle Light Scattering (SEC-MALS)	35
4.7.4	Mass Spectrometry	36
4.7.5	Nuclear Magnetic Resonance Spectroscopy	37
4.8	Assays.....	38
4.8.1	<i>In Vitro</i> Activation Assay of PamZ	38
4.8.2	Agar Diffusion Assay.....	38
4.8.3	<i>In Vivo</i> Activation Assay of Paenilamicin against Wild Type and Deletion Mutant ...	39
4.8.4	<i>In Vitro</i> Translation Assay.....	39
4.8.5	<i>In Vitro</i> Reconstitution Assay of StAM	39
4.8.6	Crosslinking Protein Interaction of StAM.....	40
4.9	Total Synthesis of Paenilamicin B2 and Its Diastereomers.....	40
5	RESULTS AND DISCUSSION	41
5.1	Antibiotic Self-Resistance in the Bee Larvae Pathogen <i>P. larvae</i>	41
5.1.1	The Biosynthetic Gene Cluster of Paenilamicin in <i>P. larvae</i> Strains.....	41
5.1.2	Molecular Cloning and Protein Purification of PamZ.....	41
5.1.3	Natural Product Purification of Paenilamicin including Variants	42
5.1.4	Evidence of Resistance Mediated by PamZ.....	44
5.1.5	Regioselective <i>N</i> -acetylation of Paenilamicin by PamZ.....	46
5.1.6	Stereoselective <i>N</i> -acetylation by Using Diastereomers of Paenilamicin B2	54
5.1.7	Structure of Binary Complex PamZ:Acetyl-CoA.....	55
5.1.8	Evidence of Self-Resistance Mediated by PamZ	59
5.1.9	Proposed Dual Self-Resistance Mechanism against Paenilamicin	60
5.1.10	Inhibitory Effect of Paenilamicin B2 on Ribosome.....	62
5.2	Biosynthesis and Potential Function of 2,5-Diisopropylpyrazine	64
5.2.1	Biosynthetic Gene Cluster	64
5.2.2	Computational Analysis of StAM	66
5.2.3	Molecular Cloning and Protein Purification of StAM	67
5.2.4	Isolation and Structure Elucidation of 2,5-Diisopropylpyrazine and Potential Derivatives	68
5.2.5	Evidence of Production <i>in P. larvae</i>	73
5.2.6	<i>In Vitro</i> Reconstitution Assay of StAM	74
5.2.7	Proposed Mechanism of StAM	80
5.2.8	2,5-Diisopropylpyrazine as a Potentially Universally Abundant Molecule in the Genus <i>Paenibacillus</i>	88
6	CONCLUSIONS AND OUTLOOK.....	91
7	REFERENCES.....	103
8	APPENDIX.....	118
