<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>The Growth Process</b>	<b>3</b>
<b>3</b>	<b>Theory</b>	<b>7</b>
3.1	Overview of Thin Film Solar Cells . . . . .	7
3.2	Nucleation and Growth on Low-cost Substrates . . . . .	8
<b>4</b>	<b>Experimental</b>	<b>11</b>
4.1	Growth equipment . . . . .	11
4.1.1	Seed layer preparation by physical vapor deposition (PVD) . . . . .	11
4.1.2	Layer growth by steady-state liquid phase epitaxy (SSLPE) . . . . .	13
4.1.3	Equipment for <i>in situ</i> silicon oxide removal by UV laser . . . . .	16
4.2	Substrates . . . . .	17
4.2.1	Glass . . . . .	17
4.2.2	Reorganized porous silicon substrates . . . . .	17
4.2.3	Silicon Wafers . . . . .	19
4.3	Characterization Methods . . . . .	20
4.3.1	Chemical and Physical Characterization . . . . .	20
4.3.2	Electrical Characterization . . . . .	24
4.3.3	Optical Characterization . . . . .	26
<b>5</b>	<b>Results and Discussion</b>	<b>29</b>
5.1	Homoepitaxially grown silicon layers . . . . .	29
5.1.1	Metallic impurity concentrations determined by SIMS and ICP-MS . . . . .	29
	SIMS analysis of a-Si . . . . .	30
	SIMS analysis of c-Si . . . . .	31
	ICP-MS analysis of c-Si . . . . .	32
5.1.2	Structural Properties . . . . .	34
5.1.3	Electrical Properties . . . . .	34
5.1.4	Minority-carrier lifetime . . . . .	37
5.2	Growth of contiguous polycrystalline silicon layers on glass substrates . . . . .	41
5.2.1	Amorphous silicon seed layers deposited by PVD . . . . .	41
	Influence of heating in SSLPE on a-Si . . . . .	42
5.2.2	Structural Properties . . . . .	43
5.2.3	Electrical Properties . . . . .	46
5.2.4	Optical Properties . . . . .	50
5.2.5	Minority-carrier lifetime . . . . .	50
5.2.6	TiN as a electrical back contact . . . . .	52

5.3 <i>in situ</i> removal of a native silicon oxide by UV-laser irradiation . . . . .	54
The experimental challenge . . . . .	54
Emergence of a native oxide layer on a-Si under relevant laboratory conditions . . . . .	55
Approximation of the substrate temperature by laser heating . . . . .	56
5.3.1 Computational Model . . . . .	57
The Heat Transfer Problem . . . . .	57
Implementation of the Model . . . . .	59
Interaction between a-Si and a single laser pulse . . . . .	61
Numerical simulations of the interaction between a-Si and a laser pulse	65
5.3.2 Growth results on laser-treated areas . . . . .	67
5.3.3 Discussion of simulations and growth results on a-Si . . . . .	68
TEM investigations of the grown layers . . . . .	70
Summary of laser treatment of a-Si . . . . .	71
5.3.4 Application of the <i>in situ</i> removal process to silicon (111) substrates .	72
Adaptation of the numerical model . . . . .	72
Interaction between laser pulses and silicon (111) substrates . . . . .	73
Growth results on silicon (111) substrates after laser treatment . . . . .	74
Discussion of simulations and growth results on c-Si . . . . .	75
Summary of laser treatment of c-Si . . . . .	76
5.4 Growth of silicon on reorganized porous silicon substrates . . . . .	79
5.4.1 Structural Properties . . . . .	81
5.4.2 Electrical Properties . . . . .	83
5.4.3 Minority-carrier lifetime . . . . .	84
<b>6 Summary and Outlook</b>	<b>87</b>
<b>Bibliography</b>	<b>89</b>
<b>Appendix</b>	<b>117</b>
<b>A Appendix</b>	<b>117</b>
