Contents	vii
List of Figures	x
List of Tables	xi
Acronyms	xiii
1 Introduction	1
1.1 Usability	1
1.2 Multi-Target Applications	2
1.3 Automated Usability Evaluation of Model-Based Applications	3
1.4 Research Direction	3
1.5 Conclusion	3
Part I Theoretical Background and Related Work	
2 Interactive Behavior and Human Error	7
2.1 Action Regulation and Human Error	7
2.1.1 Human Error in General	9
2.1.2 Procedural Error, Intrusions and Omissions	9
2.2 Error Classification and Human Reliability	9
2.2.1 Slips and Mistakes – The Work of Donald A. Norman	10
2.2.2 Human Reliability Analysis	10
2.3 Theoretical Explanations of Human Error	10
2.3.1 Contention Scheduling and the Supervisory System	10
2.3.2 Modeling Human Error with ACT-R	11
2.3.3 Memory for Goals Model of Sequential Action	12
2.4 Conclusion	12
3 Model-Based UI Development (MBUID)	13
3.1 A Development Process for Multi-Target Applications	13
3.2 The Multi-Access Service Platform and the Kitchen Assistant	14
3.3 Conclusion	15
4 Automated Usability Evaluation (AUE)	17
4.1 Theoretical Background: The Model-Human Processor	17
4.1.1 Goals, Operators, Methods, and Selection rules (GOMS)	18
4.1.2 The Keystroke-Level Model (KLM)	18
4.2 Theoretical Background: ACT-R	18
4.3 Tools for Predicting Interactive Behavior	19
4.3.1 CogTool and CogTool Explorer	19
4.3.2 GOMS Language Evaluation and Analysis (GLEAN)	20
4.3.3 Generic Model of Cognitively Plausible User Behavior (GUM)	21
4.3.4 The MeMo Workbench	21
4.4 Using UI Development Models for Automated Evaluation	22
4.4.1 Inspecting the MBUID Task Model	22
4.4.2 Using Task Models for Error Prediction	22
4.4.3 Integrating MASP and MeMo	23

4.5	Conclusion	23
-----	------------	----

Part II Empirical Results and Model Development

5	Introspection-Based Predictions of Human Performance	29
5.1	Theoretical Background: Display-Based Difference-Reduction	29
5.2	Statistical Primer: Goodness-of-Fit Measures	30
5.3	Pretest (Experiment 0)	31
5.3.1	Method	31
5.3.2	Results	33
5.3.3	Discussion	33
5.4	Extended KLM Heuristics	34
5.4.1	Units of Mental Processing	34
5.4.2	System Response Times	34
5.4.3	UI Monitoring	34
5.5	MBUID Meta-information and the Extended KLM Rules	35
5.6	Empirical Validation (Experiment 1)	36
5.6.1	Method	36
5.6.2	Results	36
5.6.3	Discussion	37
5.7	Further Validation (Experiments 2–4)	37
5.8	Discussion	38
5.9	Conclusion	38
6	Explaining and Predicting Sequential Error in HCI With Cognitive User Models	41
6.1	Theoretical Background: Goal Relevance as Predictor of Procedural Error	42
6.2	Statistical Primer: Odds Ratios (OR)	42
6.3	TCT Effect of Goal Relevance: Reanalysis of Experiment 1	42
6.3.1	Method	43
6.3.2	Results	43
6.3.3	Discussion	43
6.4	A Cognitive Model of Sequential Action and Goal Relevance	44
6.4.1	Model Fit	44
6.4.2	Sensitivity and Necessity Analysis	45
6.4.3	Discussion	45
6.5	Errors as a Function of Goal Relevance and Task Necessity (Experiment 2)	46
6.5.1	Method	47
6.5.2	Results	48
6.5.3	Discussion	49
6.6	An Extended Cognitive Model with Cue-Seeking	49
6.6.1	Model Implementation	49
6.6.2	How does the Model Predict Errors?	50
6.6.3	Model Fit	51
6.6.4	Discussion	51
6.7	Confirming the Cue-Seeking Strategy with Eye-Tracking (Experiment 3)	51
6.7.1	Methods	52
6.7.2	Results	53
6.7.3	Results Discussion	54
6.7.4	Cognitive Model	54
6.7.5	Discussion	55
6.8	Validation in a Different Context (Experiment 4)	55
6.8.1	Method	56
6.8.2	Results	57
6.8.3	Results Discussion	58
6.8.4	Cognitive Model	59
6.8.5	Discussion	60
6.9	Chapter Discussion	60
6.10	Conclusion	61

7	How Prior Knowledge Shapes Performance and Errors	63
7.1	The Effect of Concept Priming on Performance and Errors	64
7.1.1	Method	64
7.1.2	Results	65
7.1.3	Results Discussion	66
7.1.4	Cognitive Model	66
7.1.5	Discussion	68
7.2	Modeling Application Knowledge with LTMC	69
7.2.1	LTMC	69
7.2.2	Method	69
7.2.3	Results	69
7.2.4	Discussion	70
7.3	Conclusion	70

Part III Application and Evaluation

8	A Deeply Integrated System for Introspection-Based Error Prediction	75
8.1	Inferring Task Necessity and Goal Relevance from UI Meta-Information	75
8.2	Integrated System	76
8.2.1	Computation of Subgoal Activation	77
8.2.2	Parameter Fitting Procedure	78
8.3	Validation Study (Experiment 5)	79
8.3.1	Method	80
8.3.2	Results	80
8.3.3	Results Discussion	81
8.4	Model Fit	81
8.5	Discussion	82
8.5.1	Validity of the Cognitive User Model	82
8.5.2	Comparison to other Approaches	83
8.6	Conclusion	83
9	Does Optimizing for Errors and Time Lead to More Likable Systems?	85
9.1	Device-Orientation and User Satisfaction (Experiment 6)	85
9.1.1	Method	86
9.1.2	Results	87
9.1.3	Discussion	91
9.2	Conclusion	92
10	General Discussion and Conclusion	93
10.1	Overview of the Contributions	93
10.2	General Discussion	94
10.2.1	Validity of the User Models	94
10.2.2	Applicability and Practical Relevance of the Predictions	95
10.2.3	Costs and Benefits	95
10.3	Conclusion	96

Appendix
