|---|----|
| Abstract..... | 3 |
| Zusammenfassung..... | 5 |
| Contents..... | 8 |
| 1 Introduction and motivation..... | 10 |
| 2 State of the art..... | 15 |
| 2.1 Structure and function of plant cell walls..... | 15 |
| 2.1.1 Hierarchical organization of wood as an example of plant cell wall..... | 15 |
| 2.1.2 Plant cell wall composition..... | 16 |
| 2.1.3 Plant cell wall fine structure..... | 18 |
| 2.2 Structure and function of mistletoe viscin..... | 20 |
| 2.2.1 What makes a mistletoe?..... | 20 |
| 2.2.2 The species <i>Viscum album</i> L..... | 22 |
| 2.2.3 The structural organization of <i>Viscum album</i> berries..... | 24 |
| 2.2.4 The micro- and ultrastructure of viscin from <i>Viscum album</i> | 26 |
| 2.2.5 Viscin biochemistry..... | 27 |
| 3 Experimental..... | 29 |
| 3.1 Materials..... | 29 |
| 3.2 Methods..... | 29 |
| 3.2.1 Sectioning..... | 29 |
| 3.2.2 Light microscopy and polarized light microscopy..... | 29 |
| 3.2.3 Environmental scanning electron microscopy..... | 30 |
| 3.2.4 Confocal fluorescence microscopy..... | 30 |
| 3.2.5 Second-harmonic generation microscopy..... | 31 |
| 3.2.6 Manual fiber drawing..... | 31 |
| 3.2.7 Semi-automated fiber drawing coupled with polarized light microscopy..... | 31 |
| 3.2.8 Micro-tensile tests under controlled climatic conditions..... | 33 |
| 3.2.9 Thermogravimetric analysis..... | 34 |
| 3.2.10 X-ray diffraction..... | 34 |
| 3.2.11 Fiber welding..... | 36 |
| 3.2.12 Viscin multimaterial adhesion tests..... | 37 |
| 3.2.13 Making films from mistletoe viscin..... | 37 |
| 3.2.14 Preparing wound sealings and skin coatings from viscin..... | 39 |

| | | |
|-------|---|-----|
| 4 | Exploring the hierarchical structure of mistletoe viscin: A comparative study..... | 41 |
| 4.1 | Introduction..... | 41 |
| 4.2 | Results..... | 42 |
| 4.2.1 | <i>V. album</i> and <i>V. austriacum</i> | 42 |
| 4.2.2 | The mistletoe berry | 42 |
| 4.2.3 | Comparative structural analysis of berries from <i>V. album</i> vs. <i>V. austriacum</i> | 50 |
| 4.2.4 | Detailed structure of the VCB from <i>V. album</i> | 51 |
| 4.2.5 | The transition from cell tissue to fibers..... | 53 |
| 4.2.6 | The impact of drying and rehydration of viscin | 56 |
| 4.3 | Discussion | 60 |
| 5 | Unraveling the rapid self-assembly of adhesive fibers from mistletoe viscin | 65 |
| 5.1 | Introduction..... | 65 |
| 5.2 | Results..... | 66 |
| 5.2.1 | Manual fiber drawing from mistletoe viscin | 66 |
| 5.2.2 | From ultrasoft cells to stiff fibers..... | 68 |
| 5.2.3 | Macroscopic swelling and fiber moisture content | 69 |
| 5.2.4 | PLM and XRD reveal the rapid change of cellulose orientation | 70 |
| 5.2.5 | Synchrotron based WAXS and SAXS studies revealing the viscin cellulose dimensions and moisture dependent arrangement of secondary structures..... | 74 |
| 5.3 | Discussion | 76 |
| 6 | Mistletoe viscin – A versatile natural fiber-reinforced adhesive | 80 |
| 6.1 | Introduction..... | 80 |
| 6.2 | Results..... | 80 |
| 6.2.1 | Exploring the self-adhesive properties of viscin..... | 81 |
| 6.2.2 | Formation of free-standing films from mistletoe viscin..... | 85 |
| 6.2.3 | Mistletoe functions as a versatile adhesive on diverse surface chemistries | 87 |
| 6.2.4 | Biomedical potential of viscin coatings | 88 |
| 6.3 | Discussion | 91 |
| 7 | Conclusions and outlook..... | 95 |
| | References | 101 |
| | List of abbreviations..... | 110 |
| | Danksagungen..... | 111 |
| | Eidesstattliche Erklärung..... | 113 |
