# Contents

**1 Introduction** **17**

1.1 Aim and Scope of this Dissertation . . . . . 19

1.2 Organization of this Dissertation . . . . . 20

**2 Modeling of District Heating Network for EMT-type Simulation** **21**

2.1 Introduction . . . . . 21

2.2 Modeling of Enthalpy Transfer Using Electric Circuit Equivalents 23

2.3 Modeling of Components in District Heating Networks . . . . . 25

2.3.1 Pipe . . . . . 25

2.3.2 Tank . . . . . 28

2.3.3 Electric Boiler . . . . . 30

2.3.4 Heat Load . . . . . 34

2.3.5 Controlled Source of Fluid Flow . . . . . 37

2.3.6 Valve . . . . . 37

2.4 Modeling of District Heating Networks Based on Nodal Analysis . 39

2.4.1 Associated Discrete Circuit Model of District Heating Networks . . . . . 39

2.4.2 Nodal Equations of District Heating Networks . . . . . 41

2.5 Test Simulation . . . . . 44

2.6 Concluding Remarks . . . . . 48

**3 Modeling of Pipe Considering Free Convection** **51**

3.1 Introduction . . . . . 51

3.2 Transport Equations of Fluid . . . . . 53

3.3 Modeling of Pipe Using Electric Circuit Equivalents . . . . . 56

3.3.1 Assumptions . . . 57
3.3.2 Reformulation of the Transport Equations . . . 58
3.3.3 Discretization of the Transport Equations . . . 60
3.3.4 Modeling of Fluid Dynamics Using Electric Circuit Equivalents . . . 65
3.4 Validation . . . 68
3.4.1 Forced Velocity . . . 69
3.4.2 Free Convection . . . 70
3.5 Test Simulations . . . 72
3.5.1 Thermal Transient of the Heat Supply Unit . . . 76
3.5.2 Thermal Transient of the Heat Consuming Unit . . . 79
3.6 Concluding Remarks . . . 81

**4 Numerical Stability Analysis for Multirate Simulation 83**
4.1 Introduction . . . 83
4.2 Stability Analysis for System in Multirate Simulation . . . 86
4.2.1 Stability Analysis of Subsystems . . . 86
4.2.2 State-Space Model of the Entire System . . . 88
4.2.3 Delays between Subsystems . . . 90
4.2.4 Modeling of Internal Delays in the State-Space Model . . . 92
4.2.5 Stability Analysis of the Entire System in Discrete Time Domain . . . 94
4.3 Test Simulation . . . 96
4.4 Concluding Remarks . . . 100

**5 Summary 103**

**A Calculating of Parameters in District Heating Networks 105**

**B Calculation of Cross Section Areas of Control Volumes in Pipes 107**

**C Terminology 109**
C.1 Acronyms . . . 109
C.2 Symbols . . . 110
C.3 Greek Letters . . . 114

C.4 Subscripts . . . . . 115
C.5 Superscripts . . . . . 115
