

# CONTENTS

1. <i>Introduction</i> . . . . .	1
2. <i>Basic principle of semiconductor diode lasers</i> . . . . .	3
2.1 Introduction to semiconductor diode lasers . . . . .	3
2.2 Basic characterizations of diode lasers . . . . .	6
2.2.1 Threshold condition . . . . .	6
2.2.2 Output power . . . . .	8
2.2.3 Diode laser spectrum . . . . .	8
2.3 Spectral linewidth of diode lasers . . . . .	9
2.3.1 Basics of laser linewidth . . . . .	9
2.3.2 Beat note signals . . . . .	11
3. <i>Tunable semiconductor diode lasers</i> . . . . .	13
3.1 Diode laser concepts . . . . .	14
3.1.1 Monolithic diode lasers . . . . .	14
3.1.1.1 Distributed feedback diode lasers . . . . .	15
3.1.2 Extended cavity diode lasers . . . . .	16
3.1.2.1 Extended cavity diode laser configurations . . . . .	16
3.1.2.2 Principle of extended cavity diode laser operation . . . . .	21
4. <i>Simulation for micro-integration concepts</i> . . . . .	25
4.1 VHBGs for micro-integration concepts . . . . .	25
4.2 Spectral tuning of ECDLs . . . . .	26
5. <i>Measurement methods and setups</i> . . . . .	31
5.1 Measurement setups for standard characterizations . . . . .	31
5.1.1 Standard measurement setup for DFB lasers . . . . .	31
5.1.2 Standard measurement setup for ECDLs . . . . .	32
5.2 Spectral linewidth measurement methods . . . . .	34
5.2.1 Self-delayed heterodyne method . . . . .	34
5.2.2 Heterodyne method . . . . .	36
6. <i>Experimental characterizations of DFB lasers</i> . . . . .	39
6.1 Laser chip design . . . . .	39
6.2 Standard characterizations of DFB lasers . . . . .	40
6.2.1 Power-Voltage-Current characteristics . . . . .	40
6.2.2 Optical emission spectra . . . . .	41
6.3 Spectral linewidth of DFB lasers . . . . .	43

7. <i>Experimental characterizations of "macroscopic" ECDLs</i> . . . . .	49
7.1 Laser design . . . . .	49
7.2 Optimization of laser design . . . . .	50
8. <i>Micro-integration of extended cavity diode lasers</i> . . . . .	63
8.1 Micro-integration concepts . . . . .	64
8.1.1 Optimization of aspheric lens position . . . . .	64
8.1.2 Optimization of VHBG orientation and position . . . . .	66
8.2 Micro-integrated ECDLs . . . . .	68
8.2.1 Properties and performance of the micro-integrated ECDLs . .	69
8.3 Advanced concepts of micro-integrated ECDLs . . . . .	73
8.3.1 Properties and performance of the micro-integrated Rb-ECDLs	74
8.3.2 Properties and performance of the micro-integrated K-ECDLs	79
8.4 Micro-integrated ECDLs under mechanical stress . . . . .	82
9. <i>Conclusion</i> . . . . .	85
<i>List of Publications</i> . . . . .	87
Journal papers . . . . .	87
Conference contributions . . . . .	87
<i>List of Figures</i> . . . . .	91
<i>List of Tables</i> . . . . .	99
<i>List of Abbreviations</i> . . . . .	101
