

Table of Contents

Abstract	3
Zusammenfassung	4
Acknowledgments	8
Chapter 1 – The Essence of Building Technology	
1-1 The Problem	11
Technology and Advancement: The Roots of Contemporary Self-alienation	11
1-2 Objectives	22
The Advancement of Static Technology: The Quest for a New Reading	22
1-3 Hypothesis and the Main Questions	24
1-4 Research Methodology	27
1-5 The Structure of the Research	30
1-5-1 Boundaries of the Research and its Audiences	30
1-5-2 Chapters	34
Chapter 2 – Construction History: The Need for a Paradigm Shift	
2-1 Introduction	37
Architecture and Structural Engineering: Two Different Approaches	37
2-2 The History of Engineering	41
2-3 Structural Engineering and the Humanities: Towards a Philosophical Reading of Technology	49
2-4 Author Contributions	70
2-5 Conclusion	72
Chapter 3 – Architecture and Structural Design	
3-1 Introduction	75
3-2 Structure and Architecture: Definitions	77
3-2-1 Architecture	77

3-2-2 Structure	79
3-3 Structural Engineering and Architecture: The Story of a Separation	80
3-4 Seeking a Common Language: Fundamentals	88
3-4-1 The Concept and Aim of Design in Architecture and Structural Engineering ..	90
3-4-2 Architecture and Structural Engineering: Function and Form	91
3-5 Conclusion	95

Chapter 4 – The Rise and Demise of Structural Systems

4-1 Introduction	99
4-2 Form-Active Structures	100
4-2-1 Suspension Structures	101
Pre-stressed Structures in Concrete and Steel	104
4-2-2 Tensile Membrane Structures	109
4-2-3 Pneumatic Structures	110
4-3 Vector-Active Structures	115
4-3-1 Trussed Domes and Space Frames	115
4-4 Section-Active Structures	121
4-4-1 Beam Grid Systems	121
4-5 Surface-Active Structures	123
4-5-1 Reinforced Concrete Shells	123
4-5-2 Folded Plates	132
4-6 High-Rise Structures	134
4-6-1 The Historical Development of High-rises	134
4-7 Conclusion	145

Chapter 5 – Beyond Technique: A Non-linear Narration of the History of Building Materials

5-1 Introduction	148
5-2 Building Materials	148

5-2-1 Substance in Practice: New Materials and the Continuation of Traditional Values and Techniques	150
5-2-2 Towards a Revolutionary Progress in the Application of Engineering Materials	162
5-3 Conclusion	170

Chapter 6 – From Nature to Architecture: The Physical and Intellectual Origins of Building Science

6-1 Introduction	173
6-2 Architecture-nature Relations in Retrospect	174
6-2 Three Phases of Progress	177
6-3-1 Intuitive knowledge: From Geometry to Building, from Intellect to Matter ..	177
6-3-2 Scientific Knowledge	182
A. From Mathematics to Mechanics: Seeking the Hidden Harmony of the Universe .	182
B. From Mechanics to Statics: Exact Sciences in Art	190
6-3-3 The Mutual Interplay	194
6-4 Conclusion	217

Chapter 7 – Towards a Philosophical History of Construction

Epilogue	222
