
Table of Contents

Abbreviations	i
List of Figures.....	iii
List of Tables.....	vi
1 Introduction	1
1.1 Natural products and their pharmacological relevance	1
1.1.1 Some novel metabolites from underexplored sources.....	2
1.1.2 Selected classes of “pathway-specific” secondary metabolites	3
1.1.2.1 Peptides	3
1.1.2.2 Polyketides.....	6
1.1.2.3 Terpenes	7
1.2 Recent advances towards discovery of novel bioactive metabolites.....	8
1.2.1 Uncultured organisms and new ecological niches.....	9
1.2.2 Bioinformatics	10
1.3 The phylum Basidiomycota.....	10
1.3.1 Cyathane diterpenoid metabolites	11
1.4 The genus <i>Streptomyces</i> and some of its important metabolites.....	12
1.5 Essential tools supporting the discovery of novel metabolites.....	13
1.5.1 Mass spectrometry (MS)	13
1.5.2 Genome mining.....	13
1.5.3 Nuclear magnetic resonance (NMR) spectroscopy.....	14
2 Aim of the study	15
2.1 Objectives	15

3	Materials	16
3.1	Equipment and software	16
3.1.1	Equipment	16
3.1.2	Software	18
3.2	Chemicals	18
3.3	Microorganisms	19
3.4	Culture media types.....	21
3.5	Buffers and solutions	22
4	Methods	23
4.1	Isolation and characterization of laxitextine compounds from <i>Laxitextum incrustatum</i> (Basidiomycota)	23
4.1.1	Strain collection and characterization	23
4.1.2	Fermentation of <i>Laxitextum incrustatum</i> (STMA 14285)	23
4.1.3	Extraction and isolation.....	24
4.1.4	The analytical techniques used in structure elucidation	24
4.1.5	Antibacterial assays.....	25
4.1.6	Cytotoxicity assays	25
4.2	Isolation and characterization of the <i>Streptomyces</i> –derived metabolites	25
4.2.1	Isolation of the angucyclinone and anthracycline compounds	25
4.2.1.1	Cultivation, extraction and fractionation	25
4.2.1.2	Purification of the angucyclinone	26
4.2.1.3	Purification of the anthracyclines	26
4.2.2	Isolation of the nousamycin compounds.....	27
4.2.2.1	Cultivation, extraction and fractionation	27

4.2.2.2	Purification of the nousamycins	27
4.2.3	Isolation of the linaridin peptides	28
4.2.3.1	Cultivation, extraction and fractionation	28
4.2.3.2	Purification of the linaridins.....	28
4.2.4	HPLC - MS analyses.....	29
4.2.5	MALDI-TOF/TOF-MS analysis	30
4.2.6	MS/MS analysis and spectral networking.....	30
4.2.7	Amino acid analysis	30
4.2.8	NMR spectroscopic analysis	31
4.2.9	Genomic DNA extraction and sequencing	31
4.2.10	Bioactivity tests.....	31
4.2.10.1	Agar-diffusion assays	31
4.2.10.2	Micro-dilution assay for the determination of MIC values	32
4.2.10.3	Cytotoxicity	32
5	Results and Discussion	33
5.1	Cyathane xylosides from <i>Laxitextum incrustatum</i>	33
5.1.1	Bioactivity guided isolation	33
5.1.2	Structure elucidation and characterization	34
5.1.2.1	HPLC-ESI-Mass spectrometry of the laxitextine compounds	34
5.1.2.2	NMR spectroscopic analysis of compound 1 (Laxitextine A).....	35
5.1.2.3	NMR analysis of compound 2 (Laxitextine B)	41
5.1.2.4	Physico-chemical properties of laxitextines A and B.....	47
5.1.3	Biosynthesis of laxitextine A and B (Cyathane derivatives)	47

Table of Contents

5.1.4	Antibacterial activity	49
5.1.5	Cytotoxicity.....	50
5.2	Angucyclinone and anthracyclines from <i>Streptomyces</i> RK57	51
5.2.1	Angucyclinone: isolation and chemical characterization.....	51
5.2.1.1	HPLC-ESI-Mass spectrometry of angucyclinone	51
5.2.1.2	NMR analysis of angucyclinone	52
5.2.2	Anthracyclines: isolation and chemical characterization.....	58
5.2.2.1	HPLC-ESI-Mass spectrometry of anthracycline RK57A and RK57B.....	58
5.2.2.2	NMR spectroscopic analysis of the anthracycline RK57A.....	59
5.2.2.3	NMR analysis of the anthracycline RK57B	62
5.2.3	Biosynthesis of the angucyclin(on)e and anthracyclin(on)e	65
5.2.3.1	Biosynthesis of the aglycon.....	66
5.2.3.2	Biosynthesis of deoxysugars	66
5.2.4	Biological activity.....	67
5.3	Noursamycin peptides from <i>Streptomyces noursei</i> NTR-SR4.....	68
5.3.1	HPLC-ESI-Mass spectrometry of noursamycins	68
5.3.2	Spectral networking analysis.....	73
5.3.3	Structure elucidation of the isolated noursamycin peptides.....	74
5.3.4	Amino acid analysis of peptides A and B using GC-MS.....	82
5.3.5	Biosynthesis of noursamycins	83
5.3.6	Biological activity.....	87
5.4	Grisemycin derivatives – linaridin peptides from <i>Streptomyces</i> sp. T002	89
5.4.1	Identification of new metabolites.....	89

5.4.2	HPLC-ESI-Mass spectrometry of the 1768 Da peptide.....	91
5.4.3	Structure elucidation of the 1768 Da peptide	93
5.4.4	Amino acid analysis of the 1768 Da peptide.....	94
5.4.5	Identification of the putative biosynthetic gene cluster.....	94
5.4.6	Biological activity.....	95
6	Conclusions and Future perspectives.....	96
7	References.....	98
8	Appendix.....	107
