| Abstract                                 | iii |
| Zusammenfassung                          | iv  |
| Chapter 1. Introduction                  | 1   |
| 1.1. Hamilton cycles in symmetric graphs | 1   |
| 1.2. Combinatorial Gray codes            | 2   |
| 1.3. The middle levels conjecture        | 3   |
| 1.4. Efficient algorithms                | 4   |
| 1.5. Bipartite Kneser graphs             | 5   |
| 1.6. Kneser graphs                       | 6   |
| 1.7. Contents of this thesis             | 8   |
| References (own work)                    | 9   |
| References (others)                      | 11  |
