

# Table of Contents

<b>Abstract.</b> .....	i
<b>Zusammenfassung</b> .....	iii
<b>Acknowledgements</b> .....	v
<b>Abbreviations</b> .....	vii
<b>Chapter 1: Topic scope</b> .....	1
<b>Chapter 2: Theoretical background</b> .....	5
2.1 Principles of electrochemical methods and devices .....	5
2.1.1 Faradaic process: kinetics of electrons transfer .....	8
2.1.2 Butler-Volmer Model and Tafel linearization .....	11
2.1.3 Non-faradaic process at Electrode-electrolyte interfaces .....	13
2.2 Electrode materials: Conductors and semiconductors .....	15
2.3 Structural characterization .....	17
2.3.1 Electron Microscopy .....	17
2.3.1.1 Scanning Electron Microscopy SEM .....	20
2.3.1.2 Transmission Electron Microscopy TEM .....	20
2.3.1.3 Energy Dispersive X-ray Spectroscopy EDX .....	22
2.3.2 X-ray Diffraction XRD .....	23
2.3.3 X-ray Photoelectron Spectroscopy XPS .....	25
2.3.4 N <sub>2</sub> sorption .....	27
<b>Chapter 3: Instruments</b> .....	31
3.1 Electrochemical characterization .....	31
3.2 SEM .....	32
3.3 TEM .....	32
3.4 STEM .....	32
3.5 X-ray Diffraction XRD .....	32
3.6 X-ray Photoelectron spectroscopy XPS .....	33
3.7 N <sub>2</sub> sorption .....	33
3.8 ICP-OES .....	33
3.9 Elemental Analysis .....	34
3.10 Nuclear Magnetic Resonance (NMR) .....	34

<b>Chapter 4: Polyformamidine derived Iron modified Nitrogen doped carbon materials as electrocatalysts for ORR .....</b>	<b>35</b>
4.1 Introduction .....	35
4.1.1 Synthesis of M-N-C catalyst .....	37
4.1.2 Active Sites .....	38
4.2 Experimental details .....	41
4.3 Results.....	43
4.3.1. Synthesis PFA derived Iron modified N-doped carbon composites.....	43
4.3.1.1 PFA as nitrogen rich precursor for Fe-N-C composites .....	43
4.3.1.2 Effect of iron impregnation in PFA.....	44
4.3.1.2 Effect of pyrolysis temperature.....	47
4.3.1.3 Effect of iron loading.....	50
4.3.1.4 Effect of acid leaching.....	54
4.3.2 ORR electrocatalytic activity.....	60
4.3.3 XPS analysis of N speciation.....	64
4.3.4 Stability of most active PFA derived catalyst.....	66
4.4 Conclusion and Outlook.....	68
<b>Chapter 5: ITO<sub>TR</sub> as support electrode material in yolk-shell MOx@ITO<sub>TR</sub> nanocomposites for OER.....</b>	<b>71</b>
5.1 Introduction .....	71
5.1.1 Tin-Rich Indium Tin Oxide ITO <sub>TR</sub> : a novel electrode material .....	72
5.1.2 Water oxidation for sustainable fuel production.....	74
5.1.2.1 OER catalysts based in Nickel and Cobalt oxides .....	76
5.2 Experimental details .....	79
5.3 Results.....	81
5.3.1 Electrochemical stability of ITO <sub>TR</sub> .....	81
5.3.2 Synthesis of ITO <sub>TR</sub> supported transition metal oxides MOx@ITO <sub>TR</sub> .....	87
5.3.2.1 Synthesis of single metal oxide composites MOx@ITO <sub>TR</sub> .....	87
5.3.2.2 Synthesis of mixed metals M <sub>A</sub> M <sub>B</sub> Ox@ITO <sub>TR</sub> .....	91
5.3.3 Oxygen Evolution Reaction OER electrocatalysis.....	96
5.3.3.1 OER activity of single metal oxide composites MOx@ITO <sub>TR</sub> .....	96
5.3.3.2 OER activity of mixed metals M <sub>A</sub> M <sub>B</sub> Ox@ITO <sub>TR</sub> .....	99
5.4 Conclusion and Outlook.....	103
<b>Chapter 6: ITO<sub>TR</sub> derived composites as electrocatalysts for CO<sub>2</sub> reduction to formate.....</b>	<b>105</b>
6.1 Introduction .....	105
6.1.1 Mechanism.....	109
6.1.2 CO <sub>2</sub> reduction to formate on Sn and In based electrocatalysts.....	111
6.2 Experimental details .....	113

<b>6.3 Results . . . . .</b>	<b>116</b>
6.3.1 CO <sub>2</sub> RR Electrocatalytic activity of ITO <sub>TR</sub> . . . . .	117
6.3.2 ITO <sub>TR</sub> films <i>in-situ</i> re-structuration during electrolysis. . . . .	119
6.3.3 Effect of the pretreatment on the catalytic activity of ITO <sub>TR</sub> . . . . .	125
6.3.3.1 Effect of electrochemical pre-reduction. . . . .	125
6.3.3.2 Effect of air exposure. . . . .	131
6.3.3.3 XPS study of surface composition. . . . .	134
6.3.4. Comparative study of performance of pretreated samples. . . . .	140
6.3.4.1 Comparative performance in long term CO <sub>2</sub> RR catalysis. . . . .	140
6.3.4.2 Formate stability during electrolysis. . . . .	142
6.3.4.3 Catalytic activity as a function of reductive bias. . . . .	143
6.3.4.4 Tafel slopes. . . . .	146
6.3.5 Structural changes over long term catalysis and application of high overpotential . . . . .	148
6.3.6 CO <sub>2</sub> RR activity of Sn, In and Sn-In films synthesized from alternative precursors. . . . .	157
6.3.6.1 Tin, Indium and Tin-Indium films synthesized from organometallic precursors. . . . .	157
6.3.6.2 Tin, Indium and Tin-Indium films synthesized by <i>in-situ</i> electrodeposition	159
6.4 Discussion of results. . . . .	162
6.5 Conclusion and Outlook . . . . .	166
<b>Chapter 7: Summary and Outlook . . . . .</b>	<b>169</b>
<b>List of publications, talks and poster contributions. . . . .</b>	<b>175</b>
<b>Appendix. . . . .</b>	<b>177</b>
Appendix to chapter 4. . . . .	177
Appendix to chapter 5. . . . .	183
Appendix to chapter 6. . . . .	191
<b>References. . . . .</b>	<b>199</b>
