Abstract	I
Zusammenfassung	III
List of Figures	VI
Abbreviations	VII
1 Introduction	1
1.1 <i>Plastics</i>	1
1.1.1 Micro- and nanoplastics.....	3
1.2 <i>Human oral exposure to micro- and nanoplastics</i>	4
1.3 <i>The gastrointestinal tract</i>	6
1.3.1 <i>In vitro</i> models of the intestinal barrier	10
1.3.2 <i>In vitro</i> models of the intestinal immune system.....	10
1.3.3 Artificial digestion.....	11
1.4 <i>The liver</i>	11
1.4.1 <i>In vitro</i> models of the liver.....	13
1.5 <i>Cellular mechanisms of toxicity</i>	14
1.6 <i>Oral uptake and transport of micro- and nanoplastics</i>	15
1.7 <i>Toxicity of micro- and nanoplastics</i>	17
1.8 <i>Legal/regulatory situation</i>	19
2 Objective	20
3 Summary of the results	21
4 Summarizing discussion	24
4.1 <i>The agony of choice: Identification and characterization of suitable test particles</i>	26
4.2 <i>Possibilities and challenges in the detection of plastic particles</i>	28
4.3 <i>The obstacle of choosing realistic dosages</i>	29
4.4 <i>The intestinal barrier as important aspect to study fate and impact of plastic particles in vitro</i>	32
4.5 <i>Cellular effects of ingested micro- and nanoplastics</i>	34
5 Future perspectives	38
5.1 <i>What types of test substances are of further relevance?</i>	38
5.2 <i>How to improve in vitro models and study design?</i>	39
5.3 <i>How to properly evaluate the number of studies available?</i>	40
6 Conclusion	42
7 References	43

8	Original publications.....	58
8.1	<i>Publication I: Beyond microplastics – investigation on health impacts of submicron and nanoplastic particles after oral uptake in vitro.....</i>	<i>58</i>
8.2	<i>Publication II: A human Caco-2-based co-culture model of the inflamed intestinal mucosa for particle toxicity studies.....</i>	<i>84</i>
8.3	<i>Publication III: Complex intestinal and hepatic in vitro barrier models reveal information on uptake and impact of micro-, submicro- and nanoplastics.....</i>	<i>111</i>
8.4	<i>Publication IV: Influence of artificial digestion on characteristics and intestinal cellular effects of micro-, submicro- and nanoplastics.....</i>	<i>133</i>
