Preface	v
List of selected publications	vii
1 Global a priori bounds	1
1.1 Elliptic equations with nonlinear boundary condition	2
1.2 Equations with nonlinearities having nonstandard growth	5
1.3 Boundedness of solutions to variational inequalities	9
2 Multiplicity results for quasilinear elliptic boundary value problems	13
2.1 The Robin Fučík spectrum of the p -Laplacian	14
2.2 Equations involving the p -Laplace differential operator	17
2.3 Resonant $(p, 2)$ -equations with concave terms	20
2.4 General nonhomogeneous operators	22
2.4.1 Homogeneous Dirichlet boundary condition	24
2.4.2 Nonhomogeneous, nonlinear Neumann boundary condition	26
2.4.3 Open problem	27
3 Multiplicity results for variational-hemivariational inequalities	29
3.1 Infinitely many solutions	30
3.2 An abstract three-solutions-theorem and applications	32
3.3 Equivalence of constrained and unconstrained problems	35
Bibliography	39
Selected publications	47
1. L^∞ -estimates for nonlinear elliptic Neumann boundary value problems	47
2. A priori bounds for weak solutions to elliptic equations with nonstandard growth	61
3. On the boundedness of solutions to elliptic variational inequalities	75
4. On the Fučík spectrum for the p -Laplacian with Robin boundary condition	95
5. Multiplicity results for a class of elliptic problems with nonlinear boundary condition	107
6. Resonant $(p, 2)$ -equations with concave terms	125

7.	On a parametric nonlinear Dirichlet problem with subdiffusive and equidiffusive reaction	145
8.	Parametric nonlinear nonhomogeneous Neumann equations involving a nonhomogeneous differential operator	173
9.	Variational-hemivariational inequalities with small perturbations of nonhomogeneous Neumann boundary conditions	205
10.	Multiplicity results to a class of variational-hemivariational inequalities	217
11.	Boundary value problems with nonsmooth potential, constraints and parameters	241
