Zusammenfassung ..... **I**

Abstract ..... **III**

Acknowledgements ..... **VII**

Table of Content ..... **IX**

Abbreviations ..... **XIII**

Symbols ..... **XVII**

1 Introduction **1**

1.1 Project background and significance 1

1.2 Challenges and recent advances 2

1.3 Thesis aim and structure 3

2 Principles and models of Diffuse Optics **7**

2.1 Theoretical fundamentals 7

2.2 The optical properties of biological tissues and brain oxygenation 8

2.3 Forward and inverse problems in diffuse optics 13

2.4 Monte-Carlo modelling of light transport in tissues 19

3 Method and instrumentation for tissue diagnosis **25**

3.1 Modalities of NIRS system 25

3.2 Integration of time and space domain NIRS 30

3.3 Instrumentation 40

3.4 Phantoms 45

4 Space-enhanced time-domain diffuse optics in homogeneous structures **49**

4.1 Abstract 50

4.2 Introduction 50

4.3 Theory 52

4.3.1 Positive correlation in time domain 52

4.3.2 Negative correlation in space domain 53

4.3.3 Spatially enhanced time domain NIRS 54

4.4 Methods and materials 58

4.4.1 Phantoms 58

4.4.2 Experimental setup 58

4.4.3 Monte-Carlo simulations and forward model 61

4.4.4 χ^2 objective function and inverse models 61

4.5 Results 62
4.6 Analysis of uncertainty, robustness, and uniqueness 66
4.6.1 Uncertainty 66
4.6.2 Uniqueness 67
4.6.3 Stability 68
4.7 Conclusion 69
4.8 Funding and Acknowledgement 70
5 Space-enhanced time-domain diffuse optics in layered structures 71
5.1 Abstract 72
5.2 Introduction 72
5.3 Concept of space-enhanced time domain method 74
5.4 Methods and materials 77
5.4.1 Experimental setup 77
5.4.2 Preparation and characterization of the layered phantom 79
5.4.3 Monte-Carlo simulations and forward model 81
5.4.4 Measurement method and inverse procedure 82
5.5 Results 84
5.5.1 Measured data and results of the first layer 85
5.5.2 Results of the second layer based on different methods 87
5.6 Performance Metrics 91
5.7 Discussion 93
5.8 Conclusion 96
6 Current Limitations 97
6.1 Methodological limitations 97
6.2 Instrumental limitations 98
7 Conclusion and Prospect 99
